

**NORTHERN INSTRUMENT &
CALIBRATION SERVICES**
Calibration, Repair, Sales & Service

Overview

Australian-owned and trusted across industry, Northern Instrument & Calibration Services combine over 50 years of experience with advanced calibration technology to provide calibration and service solutions for testing and measuring instrumentation.

Objective

NICS aims to deliver our clients with accurate, traceable and efficient testing and calibration services for defence industry specific instrumentation — ensuring operational readiness, compliance and measurement confidence.

Why it Matters?

In defence operations, precise measurement and instrumentation calibration are non-negotiable for safety, reliability and regulatory compliance. NICS provides the specialist infrastructure and expertise to meet these demands.

Key Capabilities

- Electrical instrumentation
- Pressure and vacuum gauges
- Temperature sensors
- Torque tools
- Gas monitors
- Metrology instruments
- Survey equipment

Key Customers

- Boeing Defence
- Martin-Baker
- Sydney Trains
- UGL
- Health NSW

Key Markets

- Defence
- Transport
- Mining
- Infrastructure
- Health

Discriminators

- Newcastle, NSW laboratory (20 mins from Williamtown RAAF Base), purpose-built for in-house and on-site calibration to Australian and ISO standards.
- Committed to advancing technical capability and education to meet evolving defence requirements.
- Precise, efficient, cost-effective calibration with priority servicing and a dedicated manager ensuring on-time delivery

Quality Approvals

- IOS 9001 Cert: AU15/4734
- JOSCAR ID: 30004702
